

## **Spiritual Therapy in Integrative Medicine September 8-9, 2012**

Following on the success of the 3rd U.S. Spiritist Medical Congress (US-SMC), the 4th US-SMC was held once more at the Jack Morton Auditorium, George Washington University, in Washington, DC!

The focus of the past three congresses was to discuss scientific evidence that support the existence of the spirit and of reincarnation, the importance of spirituality in the practice of medicine, and the influence of love and forgiveness in keeping a balanced and healthy life. The main theme of the upcoming congress will be the integration of practices that use spiritual resources with those of traditional medicine in treatment and healing.

In the 4th U.S. Spiritist Medical Congress physicians, nurses, psychologists and other health care professionals will present their experience and scientific data to demonstrate that integration of spirituality and medicine can effectively benefit the patient in achieving a body-mind-soul balance.

### **Who should attend?**

The U.S. Spiritist Medical Congress is not exclusive to healthcare professionals. The conferences are intended to all those interested in learning about the mechanisms of spiritual healing and the effects of spirituality on human health.

### **Location**

Jack Morton Auditorium, George Washington University, Washington, DC

# 4th U.S. Spiritist Medical Congress
